Available Applications

Applications are delivered dynamically and are assigned to the user upon login.

Currently, the following applications are delivered dynamically:

- SPSS
- STATA
- SAS
- R
- R Studio
- Notepad++
- Python
- DBeaver
- Microsoft Office applications

Additional applications can be installed upon request, fees may apply. It is preferred such request being raised when submitting your Data Access Application. To request additional applications to be installed within the DPAU Analysis Environment, email dpau@unsw.edu.au.

The email should include the following:

Subject line: Application Installation Request – Project ID
Content must include: Project ID and name; Your full name; List of application(s) you would require for installation.
